

Park Avenue Gaming

Overview

Park Avenue Gaming is looking for a talented self-driven Mobile Applications Developer to join our skilled team of experts. We specialize in scratch card management systems; inventory tracking and Point-of-Sale mobile applications; customer facing lottery prize tracking applications; mobile device retail locator applications; social mobile casino platforms and games; Class-II digital scratch games; and many other aspects of the global lottery and gaming business. We serve a variety of gaming interests around the world and care deeply about the systems we provide and the impact it has on our customers' business.

Description

As a Mobile Applications Developer with the Park Avenue Gaming team your primary mission will be developing next generation mobile device applications and game platforms for lottery and gaming operations around the world. You will be working in all aspects of the mobile application development process including application design, integration with 3rd party software, mobile device application and game development, device hardware integration, and developing customer engagement strategies. You will be working primarily in the Angular framework and utilizing Ionic Framework and Apache Cordova System to produce mobile applications that run on both Android and iOS platforms. Experience with either native iOS (Objective-C) and/or native Android (Java) development is a plus. You will be working in concert with the rest of the Park Avenue Engineering team to rapidly respond to customer needs on existing offerings as well as to quickly engineer and bring to production new gaming applications and gaming/lottery management systems.

This position offers working remotely with semi-regular meetings in the corporate office for design sessions or project pushes. Hours are flexible with a focus on task completion rather than time on the clock. Park Avenue Gaming offers a competitive benefits package including healthcare benefits, PTO, and competitive salaries.

Primary Technical Skills

- 5+ years software development experience
- 4+ years experience with Javascript/ECMAScript development
- 4+ years experience in app development for mobile devices (Android and/or iOS)
- 3+ years experience with Angular framework
- 3+ years experience with the Ionic cross-platform development framework and/or the Apache Cordova development framework
- 3+ years experience with REST / JSON API development and connectivity
- 3+ years experience with the Phaser JS Game Engine or similar game development platform
- UI design experience, especially for mobile devices
- Experience bringing apps to market in the Apple or Google Play Stores
- Operational samples of recent mobile app development in either Android or iOS
- Mobile app analytics experience
